

UI Organized

Project Brief

Hook

UI Organized is an open source design community that aims make interface design easier and more accessible to everyone.

Description

UI Organized is a free, open-source design community built around a connected suite of tools that help people design easier and faster. Beyond the tools, it's a community of designers contributing to open-source and pro bono projects, supported by a growing repository of open-source design projects and resources.

Where comparable tools like Untitled UI, Relume, and Ant Design exist piecemeal or behind paywalls, UI Organized's core differentiator is that it's free and community driven.

Keywords

- Helpful
- Knowledgable
- Flexible
- Eager

Like minded examples

While there is no direct comparison for this project, there are various similar tools and resources that this project draws inspiration from. The primary differentiator of UI Organized is that it is free.

Research & Existing Assets

- Almost all of the piece exists but are in unfinished states. I need to
1. Finish and polish them
 2. Create a brand
 3. Bring everything together in a website

Potential Audience

There are a few design system communities at the moment that could help contribute or just spread the word

[design.systems](#)

[design systems community](#)

[redwoods design community](#) (paid 🖐️)

Another target audience are software engineers, especially those working on open source software projects.
